**Quick-Payment™ now available!**

**[San Jose, CA, November 30, 2006]**-- Better Idea Group (BIG) announced today the immediate availability of a new payment enabling application named **Quick-Payment™**. Many months in development, Quick-Payment is the only Office Accounting 2007 solution certified on IP Commerce's IPPF framework, a solution that assures customers that they will never need another application for accepting payments of any kind.

Better Idea Group has joined forces with Chase Paymentech (our preferred merchant service provider) to bring a complete solution to merchants, allowing them to process credit card transactions through IP Commerce's IPPF framework while enjoying the reliability of the Chase team.

"I'm pleased Better Idea Group has been able to partner with Microsoft, IP Commerce and Chase Paymentech to bring our customers a solid payment enabling application with partners of such a high caliber." said Ernest Cook, principal of Better Idea Group. "Chase Paymentech has very competitive rates for merchant card processing and by joining forces with IP Commerce, we are able to assure customers they will be able to add additional payment services without changing accounting systems

"I tried using the credit card processing option in the SBA 2006 menu before I switched to Quick-Payment" says Michael Nall, a Microsoft Small Business Specialist and principal of Nall Edge Networks. "With all of my credit card information locked in a web page, I had a hard time getting information that I needed about my charge sales."

"Since switching to Quick-Payment I have been able to view far more information about my credit card sales. Since they are a specialist in Office accounting development, Better Idea Group also created a custom application for me that has streamlined my monthly billing. One click and I not only generate invoices, I collect them!"

Quick-Payment is available for purchase immediately at [www.BetterIdeaGroup.com](http://www.BetterIdeaGroup.com)

**About Better Idea Group**

Founded in 1998, The Better Idea Group (BIG) is a professional services firm with a focus on Microsoft based accounting systems tailored to unique business needs. A team of experienced Silicon Valley consultants and bright interns will assess your problem, devise a solution, and complete all aspects of the project from development and implementation to training services and documentation.

**About IP Commerce**

Based in Denver, Colorado, IP Commerce, Inc. is a software company enabling open payments that allow banks and service providers to deliver payments services seamlessly to any business. The company's IP Payments Framework™ (IPPF) provides an SOA based infrastructure for the payments industry that can be utilized to host payments networks, as well as free toolkits to connect services, devices and applications to open payments. IPPF breaks down traditional barriers and connects banks, payment service providers, businesses, and software ecosystem participants together. For more information, visit [www.ipcommerce.com](http://www.ipcommerce.com).
